

Working together for a *green, competitive and inclusive* Europe

March 2021

Press release

U.A.T. Bârlad municipality, implements project no. 2020/516045 entitled **Increasing the energy efficiency of the public lighting in Bârlad / Increasing the energy efficiency of the public lighting system in Bârlad.**

The project is financed under the **Financial Mechanisms European and Norwegian Economic Area 2014-2021, Energy program in Romania, Field of interest: Energy efficiency.**

The total value of the approved grant is 1,482,355 euros covering 85% of the total estimated costs of the project. The municipality's own contribution to this project is in the amount of 222,355 euros, representing 15% of the contract value.

The general objectives of the project are: increasing energy efficiency in public lighting in Bârlad, as well as reducing greenhouse gases, with a positive effect on climate change.

The modernization works of the public lighting system are likely to lead to an increase in the quality of life and safety of the inhabitants of the municipality, as well as to the reduction of carbon dioxide emissions and electricity costs.

The investment involves the replacement of 2,590 existing luminaires with luminaires with LED technology, as well as the implementation of a high-performance remote management system based on presence and motion sensors and the adjustment of light flux as needed.

The project is implemented between November 2020 and July 2021.
